

Embracing innovation at Farnborough International Airshow 2024

Embracing innovation at Farnborough International Airshow 2024

Author: Juriaan Kellermann, CEO of Fokker Next Gen

- **Commitment to Hydrogen Combustion Technology:**

At Fokker Next Gen, we are the only OEM focused solely on developing a hydrogen combustion-powered jet airliner by 2035, aiming for sustainable and efficient air travel.

- **Navigating Industry Shifts:**

Despite the current industry emphasis on Sustainable Aviation Fuel (SAF) and SAF-hybrid electric aircraft, we remain dedicated to hydrogen technology as the ultimate solution for zero-carbon emissions.

- **Collaboration and Innovation:**

Our journey towards hydrogen-powered aviation is strengthened through robust partnerships and innovative collaborations, with productive engagements at Farnborough International Airshow 2024.

- **Strategic Direction and Future Vision:**

The airshow reaffirmed our strategic focus on hydrogen combustion, positioning us at the forefront of sustainable aviation and inviting industry collaboration to achieve true zero-carbon emissions.
